BUSTING LOOSE FROM THE MONEY GAME

Now, finally you CAN win...

WESTMINSTER, CO, June 26, 2008: Salary, bills, taxes---this is what usually comes to mind when you think about money. But what if you could shift **how** you think about money and its role in your life — ditching these limitations?

Robert Schienfeld, New York Times bestselling author of “Busting Loose from the Money Game,” can show you how to transform your mindset and strategies toward money, and get grounded with how money flows in and out of your life. In his seminar “Busting Loose from the Money Game” on **June 26th, 7 p.m.** at the **Westin in Westminster, CO**, you will learn how to let go of the old beliefs, fears and outdated teachings about money. He will show you a precise set of radical and profoundly transformative shifts in your mindset, and strategies to help money become a total non-issue in your life. You will finally learn how to **win the money game**.

What does it mean to “Win” the Money Game?

No more worrying about bills or the balance in your checkbook. No more asking "Can I afford that?" Or "Should I buy that?" No more having to save up to buy or do things -- or denying yourself what you really want because it's "too expensive." It means no more working your butt off to "make ends meet" or carve out a little pleasure or luxury in your life. In short, it means no limits or restrictions about money.

What makes this event so different?

It's not about fast-tracking your career, building a business, investing, day trading, buying or selling real estate, marketing, retirement planning or other financial topics. It **IS** about how you can change your thinking to learn to love and accept a life without the stress and complications from trying to manage, grow and protect your "winnings." When you reach the "**The Busting Loose Point**," every other aspect of your life opens up and expands to new heights. The game really is so much more than "money."

Event Details
